

**The Music Cre8tor**

**Program & Price Guide**

The *Music Cre8tor* is a powerful, easy-to-use, fun, new interactive music composition system initially designed for the needs of students with disabilities. Built and designed by a team of MNMP teaching artists, specialized programmers and following the guidance of school teachers, this unique system allows physically and cognitively challenged students as well as anyone interested in musical composition to create new music by interacting with the music cre8tor software through attachable motion sensors.

Each motion sensor can be individually modified in its sensitivity to allow any person with any kind of motion capability to use and control the device, be it through minimal or sudden, rough movements. This way anyone in a classroom can become a musical composer and be in control of a creative process in real-time, alone or in collaboration with other players.

This highly flexible and adaptable system empowers students to be in charge of the creation of beautiful music in ways they may have never imagined. This system can be connected to any modern computer and works with both Windows and Apple-based operating systems: flexibility and functionality and are built into the software package that accompanies each Music Cre8tor. The Music Cre8tor is an educative, therapeutic and emotionally rewarding artistic outlet for not only special needs students but for general education students, their teachers, therapists and parents.

Purchasing a *Music Cre8tor* system has multiple, long-lasting benefits. There are 3 packages available, each of which includes:

- the *Music Cre8tor* system/device (the sensor box and sensors)
- the *Music Cre8tor* software (for both PC/MAC)
- hands-on individualized personal training
- a manual, which includes DVD tutorials
- 2 free software upgrades
- special introductory discounts on any new hardware updates for the first year
- a curriculum
- free access to online web community of *Music Cre8tor* blogs
